

SAMEE UR REHMAN

Front-End Developer | React.js, JavaScript (ES6+) & TypeScript

Islamabad, Pakistan | +92 306 5145627 | samee6812@gmail.com | [linkedin.com/in/samee6812](https://www.linkedin.com/in/samee6812) | github.com/sameerehman001

SUMMARY

Frontend Developer with 3+ years of experience building responsive, production-grade web applications using React.js, JavaScript (ES6+), TypeScript, HTML5, and CSS3. Track record delivering role-based, multi-user dashboard interfaces with permission-driven workflows (BusRoute, EaseFix, Ethio Freight) and integrating REST APIs across enterprise, healthcare, and logistics platforms. Skilled in state management with Redux and Redux Toolkit, responsive UI development with Tailwind CSS and Material UI, and Git-based Agile workflows. Also brings full-stack (MERN) exposure with Node.js, Express.js, and MongoDB, useful for working closely with backend teams.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Redux, Zustand, Tailwind CSS, Material UI, ShadCN UI, Responsive Web Development, Component-Based Architecture, State Management, API integration,

Backend & Data: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, GraphQL, Webhooks, WebSockets

Tools & Workflow: Git, GitHub, GitLab, Jira, ClickUp, Postman, VS Code, Cursor, Agile Development, Cross-functional Collaboration, Performance Optimization

AI-Assisted Development: Claude, ChatGPT, Codex, Trae

PROFESSIONAL EXPERIENCE

Front-End Developer — Golden Hawk Technologies

Jan 2026 – Present

Islamabad, Pakistan

- Develop enterprise-grade web applications using React.js, Next.js, TypeScript, Material UI, and Redux Toolkit.
- Design scalable frontend architecture and responsive, role-based dashboards for BusRoute and EaseFix, supporting multiple user roles and permission levels.
- Optimize application performance, troubleshoot and resolve production issues, and ship new business features through REST API integration.
- Collaborate with cross-functional teams (design, backend, product) to deliver maintainable, well-documented, production-ready code in an Agile environment.

MERN Stack Developer — Poshmaals Technologies

Jan 2025 – Jan 2026

Islamabad, Pakistan

- Developed full-stack healthcare and enterprise applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented authentication, role-based access control, and REST API integrations to support secure business workflows.
- Designed reusable React.js components and collaborated with backend services to support scalable, database-driven applications.

Front-End Developer — Codistan Ventures

Nov 2023 – Jan 2025

Islamabad, Pakistan

- Built responsive web applications using React.js, Next.js, TypeScript, Tailwind CSS, and Material UI.
- Integrated GraphQL and REST APIs while developing reusable UI components and efficient state management solutions.
- Delivered production features across five projects: Ranchers Café, Campsite, Video Overlay Admin Panel, J&J, and a Predictive Analysis platform.

Junior React.js Developer — LancerHut

Jul 2022 – Oct 2023

Islamabad, Pakistan

- Developed responsive user interfaces using React.js, JavaScript, HTML5, and CSS3.
- Implemented reusable frontend components, integrated REST APIs, and resolved UI issues under senior developer mentorship.
- Collaborated through Git-based workflows, code reviews, and Agile development practices.

SELECTED PROJECTS

BusRoute — Transport Management System | <https://busroute.co/>

- Built a transport management platform using Next.js, TypeScript, Material UI, Redux Toolkit, and REST APIs.
- Built responsive, role-based dashboards for multiple user types and optimized frontend performance.

Maelano — Ecommerce Application | <https://maelano.com/landingpage>

- Developed a React.js-based eCommerce application using React.js, Tailwind CSS, Redux Toolkit, and REST APIs within a microservices architecture.
- Built responsive, role-based dashboards for Sellers, Users, Affiliates, Wholesalers, Retailers, Employees, and Warehouse teams.

Jand Jip — Web Application | <https://jandjip.com/>

- Developed logistics dashboards using React.js, Tailwind CSS, Redux Toolkit, and REST APIs.
- Implemented authentication, shipment management, and role-based workflows for carriers, brokers, and administrators.

Ranchers Café | <https://rancherscafe.com/>

- Enhanced a live food-ordering platform using Next.js, TypeScript, Tailwind CSS, Material UI, Redux Toolkit, and GraphQL.
- Integrated GraphQL APIs, delivered production features, and optimized the responsive user experience.

EDUCATION

Bachelor of Software Engineering — Capital University of Science and Technology (CUST), Islamabad, Pakistan
2017 – 2022

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Development, Software Engineering, Operating Systems, Computer Networks, Software Project Management.
